WORK EXPERIENCE

CoinDCX

Senior Software Engineer, Futures Platform | Jun 2025 – Present

- Owned planning and implementation of futures platform isolation from the monolith, cutting component boot time from 3 minutes to 25 seconds through code segregation.
- Reduced full unit test runtime from 40 to 10 minutes through code segregation, streamlining development.
- Served as single point of contact for the in-house exchange's market data service, planning and implementing multiple modules; also developed core order management system (OMS) components.

Edra Labs LLC

Founding Engineer | Mar 2024 – May 2025

- Built the admin dashboard, search engine, and scraping pipeline for allmachines.com and coveted.com launches; automated product team workflows through the dashboard.
- Developed a generic LLM-driven web scraper that cut scraping time for an OEM website from roughly 2 days to 2 hours, reducing manual effort.
- Automated product growth workflows using agentic AI tools, including Skyvern, Computer Use, and Kura.
- Led five engineers to launch a new category on allmachines.com on schedule.
- Interviewed candidates and improved the hiring process as the engineering team grew from 7 to 45+.

Wingify Software Private Limited

Software Engineer II | May 2023 – Feb 2024

- Led VWO integration builds and launches: Slack, Marketo, WordPress, Twilio Segment, RudderStack.
- Built a Google Tag Manager onboarding flow for VWO that generated 45+ leads.
- Built and deployed a Shopify app for VWO, increasing marketplace visibility and improving the app's user experience.
- Helped build an internal AI chatbot that reduced support response time by 15%.

Software Engineer I | Jun 2022 – May 2023

- Built an importer that moved Google Optimize experiments to VWO and helped convert migrating teams into customers.
- Designed and implemented backend architectures for third-party integrations with VWO.

SKILLS

Languages Go, Python, JavaScript, TypeScript

Backend System design, microservices, databases, Kafka

Infrastructure Docker, Kubernetes, GCP, AWS

Frontend React, Next.js

EDUCATION

Bachelor of Engineering in Computer Engineering | CGPA 9.4
Lokmanya Tilak College of Engineering, University of Mumbai

AWARDS

- **CoinDCX Founders' Award (2026)** — one of 5–6 recipients annually.
- **VWO Leveraging AI Hackathon** — winner.
- **Wingify Champs** — multiple-time recipient.
